Grant Received to Develop EMS Systems Plan

The Central Virginia Health Planning Council has received a grant to develop an Emergency Medical Services System Plan for Planning District II, Consisting of the counties of Amherst, Appomattox, Bedford and Campbell, and the cities of Bedford and Lynchburg.

Workshops conducted by the Council in each jurisdiction identified Emergency Medical Services to be an area of primary interest to residents of Central Virginia. Workshop participants recommended that the Health Council take the lead in initiating an EMS Systems Plan.

A Steering Committee is being established to assist the Health Planning Council's Staff in the formation of a regional Emergency Medical Services Advisory Committee.

The Advisory Committee will consist of representatives of local government, the medical community, including emergency room personnel, the area's 18 rescue squads, fire departments, criminal justice agencies, emergency services (civil defense) coordinators, Health Planning Council members and citizens at large.

In the planning process, the Committee will address fifteen (15) key areas in an Emergency Medical Services System, including manpower, training, communications, transportation, emergency facilities critical care units,accessibility of Emergency Medical Services public information and education, consumer input, evaluation and information systems, disaster linkage and mutual aid agreements.
